EDUCATION

Ajeenkya D. Y. Patil University

Pune, India

Master of Computer Application, Cloud Technology, CGPA: 9.8 — Gold Medalist

August 2019 - May 2022

EXPERIENCE

Edmingle

July 2021 - Current

Senior Platform Engineer - Backend

Tech Stack: Node.js, AWS, MySQL, Redis, Jenkins

- **Platform Scalability:** Scaled Edmingle from thousands to over **30M+ records** using microservices, optimized MySQL queries, and event-driven architecture. Improved system performance by **65%**, enabling real-time analytics and boosting revenue by **15%**.
- **High Availability & Reliability:** Achieved **99.99% uptime** through multi-AZ failovers, load-balanced services, and real-time monitoring. Ensured zero-downtime deployments and smooth scaling during academic peaks.
- **Cost Optimization:** Migrated notification services from Mailgun to Amazon SES, cutting email costs by **70%** while improving deliverability and monitoring. Deployed serverless functions and auto-scaling EC2, reducing idle compute costs by **40%**.
- **Smart Calendar & Scheduling System:** Built an interactive calendar and class scheduling module with **300ms** API response times. Adopted by **40% of platform users**, improving scheduling efficiency and user engagement.
- **Secure Payment Architecture:** Revamped multi-gateway payment integrations (Razorpay, Stripe, PayU) into a modular plug-and-play marketplace model, reducing integration time from **2 weeks to 3 days** with full webhook verification.
- **Resilient Webhook Framework:** Designed a secure and scalable webhook system with event deduplication, signature validation, and retries — enabling external integrations with real-time data sync.
- **SDK & SSO Integration:** Developed the official Edmingle SDK and integrated Single Sign-On, enhancing white-label capabilities and simplifying client onboarding.
- **Globalization & Growth Enablement:** Implemented multi-currency pricing and regional configurations, enabling Edmingle's global expansion and supporting international sales workflows.
- **Deployment Automation:** Engineered next-gen CI/CD and deployment scripts, reducing release times by **2x** and improving reliability across environments.

Rovae Inc.

July 2020 - July 2021

Software Engineer

Tech Stack: PHP, Laravel, JavaScript, MySQL, REST API

- **High-Performance Web Application:** Engineered a high-performance web application that exceeded efficiency benchmarks by **80%**. Integrated multiple third-party APIs to deliver diverse and dynamic content with seamless interoperability.
- **Inventory Management & POS Solution:** Designed and implemented a comprehensive inventory management solution integrated with a responsive Point of Sale (POS) system. Added intelligent analytics and reporting features, enabling seamless e-commerce integration for end-to-end retail operations.

OTHER WORK

ZyncSpace - AI-Powered Collaboration Platform

Team Project

Utilized: Node.js, AWS, Mysql, Redis, Socket, Message Queue

- **Purpose:** Designed and built a collaborative workspace platform with integrated AI assistant for real-time support, enabling users to manage projects, communicate, and get instant contextual help.
- **Results:** Engineered a high-performance, AI-powered collaboration platform handling 1M+ daily messages with sub-200 ms latency. Built fault-tolerant, event-driven backend using Redis queues and embeddings for contextual assistance - achieving 99.90% uptime, 3x throughput, and 40% cost reduction.

SKILLS

Languages: Node.js, Python, PHP, TypeScript, Golang, MySQL, Redis, MongoDB

Cloud & Tools: AWS (EC2, Lambda, RDS, S3, SES, CloudFront, CloudWatch, SQS), Docker, Jenkins, GitHub Actions, REST APIs, WebSockets, Microservices, LangChain, Vector Embeddings, Semantic Search, CI/CD, System Design, Performance Optimization, Cost Scalability Engineering
